

MST BLOCKCHAIN

Privacy Policy

We do not collect, store, or process your personal information

Effective Date: September 10, 2026

Last Updated: September 10, 2026

Version 1.0

mstblockchain.com

1. Introduction

MST Blockchain ("we," "us," or "our") is committed to your privacy. This Privacy Policy describes how our blockchain platform, website, developer tools, and MCP server (mst-mcp) interact with you — and confirms that we do not collect, store, or process any personal information from users of our Services.

Our Services are designed to be used without submitting personal data. We believe that privacy is a fundamental right, and we have built our platform to respect that principle from the ground up.

Our Commitment: MST Blockchain does not collect, store, sell, or share any personal information from users of its Services. No registration is required to access our documentation, tools, or blockchain network.

2. Who We Are

MST Blockchain operates the MST Chain, an EVM-compatible Layer-1 blockchain network, and associated developer tools including the mst-mcp documentation server. We provide these Services without requiring any personal information from you.

Contact Detail	Information
Company Name	MST Blockchain
Website	https://mstblockchain.com
MCP Server	https://mcp.mstblockchain.com/sse
Privacy Inquiries	support@mstblockchain.com

3. Information We Do Not Collect

We do not collect any personal information. Specifically, we do not collect, request, store, or process any of the following:

Data Category	Our Practice
Names, email addresses, or usernames	Not collected — no account or registration required
Passwords or authentication credentials	Not collected — our Services require no login
Payment or billing information	Not collected — all Services are freely accessible
Identity or KYC documents	Not collected — no identity verification required
IP addresses or device identifiers	Not tracked, logged, or stored
Browser type, OS, or device data	Not collected — no telemetry or fingerprinting

Data Category	Our Practice
Usage data or clickstream analytics	Not tracked — no analytics tools deployed
Cookies or tracking technologies	Not used — no cookies of any kind
Location data	Not collected or inferred
MCP query content or history	Not logged — tool calls are fully stateless

Zero Tracking: We do not use Google Analytics, tracking pixels, session recording tools, fingerprinting scripts, or any other third-party tracking technologies on our Services.

4. The mst-mcp Server & Privacy

The mst-mcp server provides read-only access to MST Blockchain documentation via the Model Context Protocol (MCP). It is built with privacy at its core:

- No user authentication is required to access the mst-mcp server
- Tool calls (list_documents, read_document, search_documents) are fully stateless
- No query content, search terms, or document requests are stored or logged
- No session identifiers or user identifiers are created or tracked
- No personal data is transmitted to or from the mst-mcp server

When you access the mst-mcp server through an AI platform such as Claude.ai or the Anthropic API, any data handling by that third-party platform is governed by their own privacy policy. MST Blockchain has no visibility into or control over how third-party AI providers handle your interactions.

MCP Privacy: The mst-mcp server operates as a pure read-only documentation gateway. Every request is independent — no state, no sessions, no logs, no personal data.

5. Public Blockchain Data

MST Chain is a public, decentralised blockchain. It is important to understand the nature of on-chain data:

- Wallet addresses, transaction data, smart contract interactions, and all on-chain activity are publicly visible and permanently recorded on the blockchain by design
- This is an inherent property of public blockchain networks — not a data collection practice by MST Blockchain
- We do not control, restrict, or have exclusive access to on-chain data; it is visible to all network participants
- We do not link on-chain wallet addresses to any personal identity information

Important: Do not include sensitive personal information in blockchain transactions, smart contract data, wallet labels, or transaction metadata. On-chain data is permanent and publicly visible.

6. Third-Party Services & Links

Our Services may link to or integrate with third-party platforms such as GitHub, block explorers, the Anthropic API, or partner documentation services. This Privacy Policy applies solely to MST Blockchain's own Services.

We are not responsible for the privacy practices of third-party services. When you interact with a third-party platform — including AI providers that use the mst-mcp server — we encourage you to review that platform's own privacy policy.

Third-Party Context	Who Governs Data
Claude.ai / Anthropic API (using mst-mcp)	Anthropic's Privacy Policy
GitHub (code repositories)	GitHub's Privacy Policy
Block explorers	The respective explorer's Privacy Policy
Testnet faucet providers	The respective provider's Privacy Policy

7. Children's Privacy

Our Services do not target and are not intended for use by individuals under the age of 18. Because we do not collect any personal information from any users, we also do not knowingly collect any information from minors.

8. Security

Because we do not collect or store personal information, there is no personal data at risk from our platform. Our infrastructure security focuses on:

- Availability and integrity of the MST Chain network and MCP server
- Encrypted communication for all web properties (HTTPS / TLS 1.2+)
- Protection of our own operational systems and source code repositories

If you believe you have discovered a security vulnerability in our Services, please contact us at security@mstblockchain.com.

9. Your Privacy Rights

Because MST Blockchain does not collect, store, or process any personal information, traditional data subject rights (such as the right to access, correct, or delete personal data) are not applicable in the conventional sense — there is simply no personal data held about you.

If you have any questions or concerns about your privacy in connection with our Services, you are welcome to contact us at privacy@mstblockchain.com and we will respond promptly.

No Data Held: Since we hold no personal data about you, there is nothing to access, correct, export, or delete. Your privacy is protected by the absence of data collection, not by data management controls.

10. Cookies & Tracking

We do not use cookies, tracking pixels, web beacons, local storage, session storage, or any other tracking or fingerprinting technologies on our Services. Your visit to our website and use of our tools leaves no persistent trace on our systems.

11. Cross-Border Considerations

As we do not collect or transfer any personal information, cross-border data transfer regulations (such as those under GDPR or similar frameworks) are not applicable to our data practices. Our infrastructure may be hosted in various regions for availability purposes, but no personal data is transmitted or stored in those environments.

12. Changes to This Policy

We may update this Privacy Policy from time to time to reflect changes in our Services or applicable laws. When we make changes, we will update the "Last Updated" date at the top of this document and post the revised policy on our website.

We encourage you to review this policy periodically. Continued use of our Services after any changes constitutes acceptance of the updated policy. Given our no-collection approach, any future changes that would involve data collection will be clearly communicated and will require obtaining appropriate consent before implementation.

13. Applicable Standards

While our no-collection approach means most data protection regulations are not directly applicable, we voluntarily align with the principles of:

- General Data Protection Regulation (GDPR) — EU/EEA
- California Consumer Privacy Act / California Privacy Rights Act (CCPA/CPRA)
- Privacy by Design and Privacy by Default principles
- Decentralised identity and self-sovereign data principles

Our fundamental position is that the best way to protect user privacy is not to collect user data in the first place.

14. Contact Us

If you have any questions, concerns, or feedback about this Privacy Policy or our privacy practices, please reach out: Support@mstblockchain.com
